

Fill Out the Census

...and help provide funding that supports medical issues, including COVID-19.

Medical programs that sustain and save lives depend on us. Census data helps healthcare professionals determine which communities need new hospitals and healthcare facilities, and for the hiring of medical professionals.

An accurate 2020 census participation rate will help to ensure critical services such as Medicaid, Medicare, and MIChild continue in Michigan. As Michiganders, let's commit to doing our part to take care of our family, friends and neighbors.
