

Did you fill out your census?

The 2020 census provides funding for medical programs across Michigan. Fill yours out today and help ensure the future health of Michigan residents.

Healthcare providers and government agencies rely on accurate census information to make decisions about the products and services they provide.

Michigan healthcare centers in underserved rural and urban communities are able to provide primary healthcare services regardless of the ability to pay, and MIChild can administer healthcare programs to all low-income, uninsured children of Michigan's families.

Remember, census data helps government agencies determine fund allocation, so your participation in the 2020 census will ensure Michigan communities get the vital medical care resources they need.
